

drop^out[®]

ALL IN ONE PARTICLE REMOVER

Automotive

On the production line ...

“We installed a DO4000T, a DO2000S, four DO900S and two DO60S in our Final Assembly Line in Uitenhage, South Africa. Our previous membrane-type air cleaning systems on this line were expensive to run consuming a lot of air during their operation. We are very happy with the performance of Dropout on our final assembly line and since installation the Dropout technology has been performing very reliably”.

Sean Robertson

Volkswagen Group South Africa

About Dropout®:

Dropout® is a leading supplier of filtration equipment into the compressed air industry. **Dropout®** offers an extremely high performance ALL IN ONE solution. **Dropout®** removes liquid water and other contaminants at a wide range of flow rates without the need for replacement filter elements. This ultra-efficient “super filter” has been tested intensively achieving an amazing result of 99.999% liquid water removal efficiency and results of 99.99% particle removal efficiency (down to 1 micron).
